

## Questions and solutions

### How do I solve a problem with the subscription link for massejli whatsapp?

If the problem is that the subscription link in "my massejli" is not responding, as the link does not allow the customer to join WhatsApp groups, then you must make sure that all links you added on the group subscription links page are correct and modified if you update or revoke a particular link, you must edit it and it's also on [my massejli board](#).
