Wordpress Plugin
Customize your WordPress plugin

For the extension to work, the first step is to enter the WhatsApp API information that you can get from your account at my.massejli.com, after entering them correctly, click on the "Save Changes" button.
There are several sections that you can take advantage of by linking your blog to massejli service via WhatsApp:

• WhatsApp widget:
The widget appears for visitors when they visit your blog, and through it they can talk to you via WhatsApp. You can modify the texts that appear in the widget as you want and how they are displayed on the right or left of the screen.

• WhatsApp groups and WhatsApp conversations of individuals:
You can send articles to individuals and customize the way the message arrives via WhatsApp with a picture or video first, the entire article or a part of it, with the use of the message template on massejli Person or not, when choosing to send the message to individuals, you will reach a group of numbers that include a list that you can put with a look that the WhatsApp number must To be complete with the country code and without two zeros at the beginning of the plus sign

• Send a WhatsApp message from the Contact Form 7 plugin
When visitors communicate with you by default Contact Form 7 send email will be send to you, but by adding massejli you will also receive the message via WhatsApp, on the contact form page create a form tag, its type tel and name it: massejli-mobile and make it an obligatory field like this: [tel * massejli-mobile]

• Receive WooCommerce order via WhatsApp
When you activate this option, you will receive a WhatsApp message detailing the order content when the customer finishes shopping on your site.
