

Service phone numbers

whatsapp Groups link

If you are a holder of WhatsApp groups, you can collect them in one link instead of posting a lot of links.

When the contact clicks on the link to enter one of the groups, massejli enters him into one of the groups. Which relieves you the burden of manual entry of participants in the group, and you can put links to direct conversations on the private as well.

To add links, click on the subscription links, select the group name, then click on the plus sign and copy the group link that you find in the WhatsApp application, put a name for the link.

then put the full link <https://wa.massejli.com/user> This will be the main subscription link for your account, but instead of the word user, it will be your account name.

You can post the subscription link in the template used during sending the message within the settings or in the chat bot for contacts to see with each post. Don't forget to click on Save Links
